

Events. & Triggers

- Item added.
- Item moved to top.
- NOT for items ~~lose~~ ~~lose~~ losing significance.
- (?) for items gaining significance, but not reaching top? (ie: moving up)

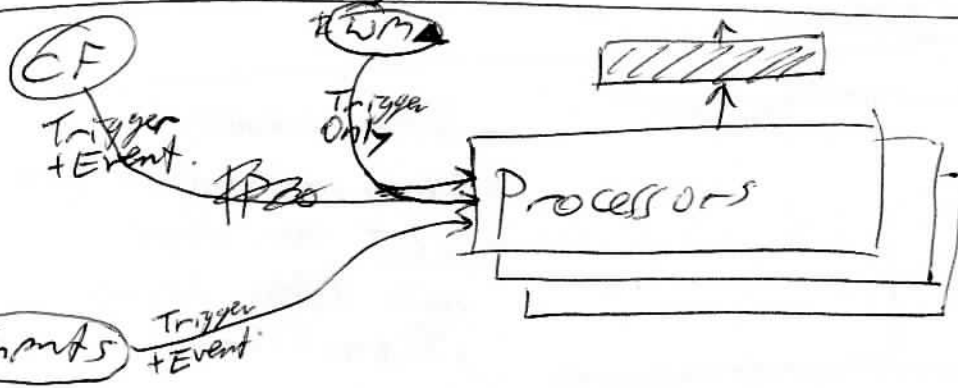

moving down,
or being compacted.

OR: should this be "triggers" (low-level), which fire on any Δ

- Events don't go straight to S.T.M.
- Events are processed via conscious feedback in one way or another and then stored.

Events & Triggers

- Triggers are low-level ~~parallel~~ parallel \rightarrow serial converters. They don't mean that anything is guaranteed to happen.

In humans,
All 5 senses + C.F.
behave in exactly same
way:

- stream of ~~the~~
- not discrete events
- Ifr up to processors to choose when to pay attention.
